Permanent Hair Straightening systems like Yuko, Bio-ionic, Matrix and IHR are all the rage right now. We'll be reporting back on your views regarding the different systems which you like, and which you don't.

Right now this site is still being developed but the author would highly recommend the salon which continues to do a great job of straightening hair, European Leaders in Permanent hair Straightening - ColourNation London Hairdressers who use the IHR/Bio Ionic Permanent Hair Straightening System with amazing results.
